| | agree | disagree | reflection |
|---|-------|----------|------------|
| Sea lice are a threat to young salmon | | | |
| “Fish farms are crowded just like a human refugee camp and they are an ideal breeding ground for fish lice.” | | | |
| Parasites such as sea lice flourish in cold water | | | |
| Salmon adapt easily to changing water temperatures. | | | |
| Department of fisheries method of weighing fish to see if they’re healthy is like weighing a child to determine if he is ill. | | | |
| With the continued effects of sea lice on our wild salmon stocks, these salmon may soon be nonexistent | | | |
| Populations of farmed salmon can be regulated | | | |
| Wild salmon are being eaten alive by sea lice because of the vast numbers of sea lice that are a direct result of fish farms. | | | |
