

Before	<p style="text-align: center;">Phrases from Lekeyten's presentation (The Disappearance of Fraser River Salmon)</p> <p style="text-align: center;">Before viewing the video: Write true or false in the 'before' column to indicate if you believe each statement to be true or false. After the lesson you may wish to review your previous beliefs to see if you've changed your opinion.</p>	After
	1. Damming a river has little effect on the salmon because they adapt easily to new surroundings.	
	2. Erosion of riverbanks affects all inhabitants of the river.	
	3. When a river is dammed, it's easy for salmon to find another river to use in its place.	
	4. Today, salmon are more plentiful than ever before.	
	5. Because of rules and regulations imposed by cities, housing developments have little effect on the Fraser River and its tributaries.	
	6. The Fraser River is not affected by pollution because we have laws that protect this from happening.
